

Cisco Security Suites help improve efficacy, experiences and economics with a rich portfolio of security solutions that help improve your security posture. The suites (**User Protection, Cloud Protection and Breach Protection**) help organizations secure their users, protect their infrastructure and accelerate detection of attacks.

Benefits:

User Protection: Secure, seamless access to any app, any time, on any device.

Cloud Protection: Protect hybrid and multicloud environments with end-to-end security for applications, workloads, networks, and clouds.

Breach Protection: Empower your security teams to simplify operations and accelerate response.

Use Cases:

User Protection:

- Defend against all user attack vectors
- One simple experience for secure access to all apps (not just some)
- Centralize policy management for traditional and modern apps

Cloud Protection:

- Stop lateral movement of attacks
- Simplify multicloud security operations
- Consolidate management of security policy

Breach Protection:

- Detect and respond to sophisticated threats like ransomware
- Significantly accelerate incident response
- Achieve Tier 2 outcomes from Tier 1 analysts

Suite Components: ¹

User Protection: ²

- [Cisco Duo](#)
- [Cisco Secure Access](#) ³
 - [Umbrella SIG](#)
 - [Secure Client](#)
 - [AI Assistant](#)
- [Email Threat Defense](#)
- [Secure Endpoint](#)
 - [Secure Malware Analytics](#)
- [AI Intellectual Property Protection](#)

Cloud Protection:

- [Attack Surface Mgmt.](#)
- [Cisco Vulnerability Mgmt.](#)
- [Multicloud Defense](#)
- [Cloud Application Security](#)
- [Secure Workload SaaS](#)

Breach Protection: ²

- [Cisco XDR](#)
 - [Ransomware Recovery](#)
- [Email Threat Defense](#)
- [Secure Endpoint](#)
 - [Secure Malware Analytics](#)
- [Secure Network Analytics](#)

¹ Based on individual At-a-Glance. Components subject to change.
² User and Breach Suites can be combined.
³ Includes RBI and embedded version of Experience Insights with ThousandEyes
